Nuclear Regulatory Commission (NRC) take action with regard to St. Lucie Plant, Units 1 and 2, and Turkey Point Nuclear Generating, Units 3 and 4. The petitioner requested that the NRC take immediate action to shut down or prohibit restart of the St. Lucie Plant, Units 1 and 2, and Turkey Point Nuclear Generating, Units 3 and 4, “until a criminal investigation of the AMES Group LLC is complete and everything has been verified safe.”

The request is being treated pursuant to Section 2.206 of Title 10 of the Code of Federal Regulations (10 CFR) of the Commission’s regulations. The request has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by Section 2.206, appropriate action will be taken on this petition within a reasonable time. The petition review board (PRB) held a teleconference with the petitioner on July 9, 2012, during which the petitioner was given the opportunity to supplement the original request with additional information in advance of the PRB’s decision to accept or deny the petition. The PRB denied the petitioner’s request for immediate action because the NRC staff did not have sufficient information to support a shutdown or prohibit the restart of the St. Lucie and Turkey Point plants. The NRC Region II Office is conducting an examination of the petitioner’s concerns. The PRB accepted the petition for review but it will be held in abeyance pending the outcome of Region II’s examination. A copy of the petition is available for inspection at the Commission’s Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available documents created or received at the NRC are accessible electronically through the Agencywide Documents Access and Management System (ADAMS) in the NRC Library at http://www.nrc.gov/reading-rm/adams.html. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1–800–397–4209 or 301–415–4737, or by email to PDR.Resource@nrc.gov.

Dated at Rockville, Maryland, this 29th day of August 2012.

For the Nuclear Regulatory Commission.

Eric J. Leeds,
Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P
the 2013 plan year. On May 8, 2012 (at 77 FR 27099), PBGC gave public notice that it was submitting the revised procedures and instructions to OMB for review. On July 6, 2012, the President signed into law the Moving Ahead for Progress in the 21st Century Act (MAP–21). MAP–21 includes provisions affecting PBGC premiums. PBGC has modified its proposed premium filing procedures and instructions accordingly; this notice informs the public of the modified OMB submission.

PBGC now intends to revise the 2013 filing procedures and instructions to:

- Provide for revoking a prior election to use the Alternative Premium Funding Target (APFT) to determine unfunded vested benefits (UVBs). (Under PBGC regulations, an election to use the APFT is irrevocable for 5 years; 2008 was the first year that plans were permitted to elect the APFT, so 2013 is the first year for which it is necessary to collect this information.)
- Require plan administrators to provide a breakdown of the total premium funding target into the same categories of participants used for reporting on Schedule SB to Form 5500, i.e., active participants, terminated vested participants, and retirees and beneficiaries receiving payment. PBGC uses the premium funding target to estimate termination liability, e.g., for the annual contingency list, and a breakdown will enable PBGC to make a much better estimate than simply using only the total premium funding target.
- Require plan administrators to report a contact name to make it easier for PBGC to contact a plan. Filers also will have the option of providing an additional plan contact.
- Require plan administrators to report the plan effective date for all plans rather than just new and newly covered plans. This date helps PBGC trace plans that change Employer Identification Number or Plan Number.
- Require plan administrators to break down the premium credit information in the comprehensive premium filing into two items rather than aggregating the premium credit. This information will help PBGC to manage the application of overpayments.
- Add a data item for the MAP–21 variable-rate premium cap, which is first effective for 2013.
- Explain how MAP–21 affects premium computations.
- Eliminate the following data items:
  - The plan sponsor’s address.
  - The boxes to check if there has been a change in name for a plan sponsor or a change in name or address for a plan administrator.
  - The payment method for paper filers.
  - Reorder and re-number some items on the illustrative form that accompanies and is part of the instructions, and make other minor changes.

The collection of information under the regulation has been approved by OMB through December 31, 2013, under control number 1212–0007. PBGC is requesting that OMB extend approval of this revised collection of information for three years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that it will receive 29,900 premium filings per year from 24,600 plan administrators under this collection of information. PBGC further estimates that the average annual burden of this collection of information is 8,200 hours and $54,387,000.

Issued in Washington, DC, this 6th day of September, 2012.

John H. Hanley,
Director, Legislative and Regulatory Department, Pension Benefit Guaranty Corporation.
